THEMES & BENEFITS

JAPLO WONDER WORLD Soothers are specially designed to safely satisfy your baby's non-nutritive sucking instinct. We want to give your baby the best synthesis by having 4 themes with attractive colours combination and animation as follows:

THEMES	BENEFITS
1. PRO	Stimulates your baby's basic art of learning.
2. FOREST	Stimulates your baby's spirit of adventure.
3. FRUITY	Stimulates the 5 Senses of your baby: Tasting, Hearing, Smelling, Touching and Viewing.
4. TWINKLE STAR	Stimulates your baby's imaginations.

FEATURES

The colourful combination of the soothers will also stimulate your baby's cognitive and visual development. It is a holistic effect which nurture's the intuition, imagination and creativity of your baby.

The luminous handle gently glows in the dark allowing parents and baby to locate soothers easily during the night and dark environment.

SHAPE OF THE TEATS

For each theme, there are 4 types of teats, which are New Born, Cherry, Olive and Orthodontic.

NEW BORN

The smaller and shorter shape of the teat is suitable for your baby's comfort and familiarity. Suitable for newborn and up to 3 months.

CHERRY

The shape of the teat have been designed similar to the shape of mother's breast nipple. It is suitable for your baby of 3 months and above.

OLIVE

When your baby's teeth started to grow and likes to bite, Olive shape is the choice to be given to your baby as a form of good exercise to aid healthy teething. It is suitable for your baby of 3 months and above.

ORTHODONTIC

The curve of the orthodontic soother shield pulls gently inward as your baby sucks, and it encourages healthy teeth and jaw development of your baby. It is suitable for your baby of 3 months and above.

QUALITY

JAPLO WONDER WORLD Soothers are made of non-toxic hygienically formed natural bite-resistant material. JAPLO soothers are specially designed to form naturally in babies mouths satisfying babies needs for supplement sucking.

They are complied to International Standard: British Standard 5239 and Safety Toy Standard: EN71-3 for parents peace of mind and babies safety.

WONDER WORLD

Swiss biologist and psychologist Jean Piaget (1896-1980) is renowned for constructing a highly influential model of child development and learning. Piaget's theory is based on the idea that the developing child builds cognitive structure for understanding and responding to physical experiences within his or her environment.

Piaget further attested that a child's cognitive structure increases in sophistication with development, moving from a few innate reflexes such as sucking the soother and nipple to highly complex mental activities.

In general, our society tends to favour Left-Brain modes of thinking, while downplaying the Right-Brain ones in a child's development and learning stage.

Left-Brain scholastics subjects, focus on logical thinking, analysis and accuracy. Right-Brained subjects, on the other hand, focus on aesthetics, feelings and creativity.

LEFT BRAIN	RIGHT BRAIN
Logical	Random
Sequential	Intuitive
Rational	Holistic
Analytical	Synthesizing
Objective	Subjective
Looks at parts	Looks at wholes

The recent trend shows our society's progress towards stressing the importance of balancing Left and Right-Brain development that controls two different "modes" of thinking.

TAKASO RUBBER PRODUCTS SDN. BHD. sees the needs of nurturing your baby with love. Therefore, equal weight to the arts, creativity and the skills of imagination and synthesis should be developed at each different learning stage as soon as your baby is born.
